

Connecting your iPad Device to a Wireless Network

<p>1. Open Settings by touching the Settings icon on your iPad's home screen.</p>	
<p>2. Tap Wi-Fi. Make sure the switch is in the "on" or green position.</p>	
<p>3. Select a network to join simply by tapping the name of the network. If a lock icon appears next to the name of a network, then enter the password and tap Join.</p>	

4. Enter your Alamo College Student Email, and then tap Log In.

5. Look for the Wi-Fi icon in the upper left corner of your iPad. This icon shows your iPad is connected to a network. The more bars you see on the icon, the stronger the signal.
