Certified Pharmacy Technician (CPhT)

Pharmacy technicians play an integral role in supporting pharmacists and providing safe and effective care to patients in community, hospital/health system, ambulatory care, military, compounding, online, veterinary, and other practice settings. Specific responsibilities will vary by the type of practice setting and the technician's level of experience. In general, a pharmacy technician may take and review medication histories, enter prescription orders, package and label prescriptions & operate automated dispensing systems, maintain inventories, process insurance claims, and compound sterile preparations.
