

New Bachelor of Applied Science

Degree Plan Title: Operations Management – PAC **Implementation Date:** _____

Major Code: _____ *(assigned by CSI)*

Degree Plan Description:

The Bachelor of Applied Technology degree (BAT) in Operations Management will educate, train, and develop successful supervisors who will be prepared to utilize technology to create a competitive advantage for their enterprise. Coursework is balanced between practical training and working with real-life projects that enhance the educational experiences and employment potential for students. The breadth of the coursework enables each graduate to lead and manage by utilizing a wide variety of business, finance, technology, and human resource development skills. Interactions with business leaders will provide graduates exposure to the real world and an opportunity to network.

Degree CIP: 52.0201

Department to which program is assigned: Business Management
