#### Flu Season is here

The best way to reduce your risk from seasonal flu and its potentially serious complications is to get vaccinated every year. Everyone 6 months and older should get a flu vaccine every season with rare exceptions. Vaccination is particularly important for people who are at higher risk of serious complications from influenza.

#### Preventive Steps

CDC recommends everyone stay up to date with COVID-19 vaccination, including all primary series doses and boosters for their age group. Getting a COVID-19 vaccine after you recover from COVID-19 infection provides added protection against COVID-19. People who are moderately or severely immune-compromised have different recommendations for COVID-19 vaccines, including boosters. In general, you do not need to wear a mask in outdoor settings. CDC recommends that instead of quarantining if you were exposed to COVID-19, you wear a high-quality mask for 10 days and get tested on day 5. CDC recommends that if you test positive for COVID-19, you stay home for at least 5 days and isolate from others in your home.

## November's focus is Prostate Awareness.

This month we will focus on prostate awareness. We will highlight the importance of prostate health, function, and illnesses this month during The Talk with SPC Nurses via zoom on November 15th at 1:00pm. <https://alamo.campuslabs.com/engage/event/8520828>

50% of men in their 60's and nearly 90% at 70 or older have symptoms of an enlarged prostate (BPH). Prostate cancer is the third leading cause of cancer deaths in men. Over 230,000 men are diagnosed with prostate cancer each year and more than 30,000 men will die from it. Higher risk includes African-American men older than 60, farmers, tire plant workers, painters, and men exposed to cadmium. Prostatitis is an issue for all ages and affects 35% aged 50 and older. Visit [mayoclinic.org](http://mayoclinic.org) and [pcf.org](http://pcf.org)
