ALAMO COLLEGES DISTRICT

PVC SUMMARY OF ACTIONS
May 7, 2018

The actions, agreements and decisions of the PVC are the result of a robust, consensus-based group deliberation and decision-making process. The process utilizes input from various internal councils and teams as well as external factors.

These memoranda are archived on alamo.edu , under Chancellor's Communications (PVC Summary of Actions).

New Workforce Program Development - AAS in Histologic Technician Program

The PVC approved the request for a new program offering for AAS in Histologic Technician; moving from certificate program to AAS. The item will need to complete the curriculum process before coming to the Board.

Staff Engagement Design Team Update

Dr. Vela, administrator champion, provided an update on the status of Staff Engagement Design Team work to date. He reported that Dr. Cleary will serve as a co-champion to help move the project forward. He informed the PVC that the proposed staff engagement

model is to come to the PVC on July 16, 2018 for review, and to the July 24, 2018 Regular Board Meeting.

New Program Approval Process Overview

Dr. Christa Emig, Director of Curriculum Coordination & Transfer Articulation, Alamo Colleges District, provided the PVC an overview of the New Program Approval Process. The New Program process requires an item to go to the PVC three times: for Initial Approval, for Program Development Approval, and then Final Approval. As part of this process improvement, the submitter/college will now identify the requested approval (Initial Approval, Program Development Approval, Final Approval) in the PVC Agenda Item Submission template. The PVC agreed to make necessary adjustments to the PVC agenda development and minutes processes in order to support the New Program Approval Process. Michelle Perales will add an identifier question for New Program Approvals to the PVC Agenda Item Submission template and notation in the minutes to help facilitate this process.
