Preventive Steps

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19: Fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, new loss of taste or smell, sore throat, congestion or runny nose, nausea, vomiting, and diarrhea. This list does not include all possible symptoms. The CDC will continue to update this list as we learn more about COVID-19. The CDC recommends avoiding close contact with people who are sick, coughing and or sneezing. You should also avoid touching your eyes, and clean and disinfect surfaces and objects. **Source:** <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/index.html>.

World Health Day is April 7th

This month we will focus on the brain, mental health and sleep. Please join us on Zoom as we will discuss these topics on April 7th for Wellness Wednesday from 2:00PM-3:00PM. Sleeping helps us to recover from mental as well as physical exertion. Sleep and health are strongly related - poor sleep can increase the risk of having poor health, and poor health can make it harder to sleep. Sleep disturbances can be one of the first signs of distress.
