

Connecting your Windows 7 Device to a Wireless Network

1.	On right side of task bar, you will see a wireless network icon like the one pictured. Click on it.	▲ (1) 7:49 AM 6/3/2014
2.	A window with available network connections will open. To refresh the list of available networks, click on the button highlighted in the screenshot below.	Currently connected to: Unidentified network No Internet access Wireless Network Connection ALAMONEt DELL SSOWI INTERACTIVE Alamo Guest CIG24G, d0542de766d Other Network CIG24G, d0542de766d CIDENT CIG24G, d0542de76d CIDENT CIG24G, d0542de76d CIDENT CIG24G, d0542de76d CIDENT CIG24G, d0542de76d CIDENT CIG24G, d0542de76d CIDENT CIG24G, d0542de76d CIDENT CIDENT CIG24G, d0542de76d
3.	 Windows 7 will show the following: network name, signal strength, the type of wireless security used (if any) and its Service Set identifier (SSID). Click on Alamo Guest. If you plan to use that network in the future, make sure you check the box that says 'Connect automatically'. This way, when you start your laptop next time, in the same area; it will automatically connect to this wireless network without requesting any manual intervention. Next, click on the Connect button. 	Not connected Connections are available Wireless Network Connection ALAMONet Alamo Guest Information sent over this network might be visible to others. Informatically Connect automatically DELL SSOOWI INTERACTIVE
