**Documentary:** The Inventor: Out for Blood in Silicon Valley. Tuesday 9 April, ASB 239, 9-11:30. Academy Award winner Alex Gibney directs a documentary investigating the rise and fall of Theranos, the one-time multibillion-dollar

healthcare company founded by Elizabeth Holmes. In 2004, Elizabeth Holmes dropped out of Stanford to start a company that was going to revolutionize healthcare. In 2014, Theranos was valued at \$9 billion, making Holmes, who was touted as “the next Steve Jobs,” the youngest self-made female billionaire in the world. Just two years later, Theranos was cited as a “massive fraud” by the SEC, and its value was less than zero. Drawing on extraordinary access to never-before-seen footage and testimony from key insiders, director Alex Gibney tells a Silicon Valley tale that was too good to be true. With all the drama of a real-life heist film, the untitled documentary will examine how this could have happened and who is responsible, while exploring the psychology of deception. An HBO Production. Alberto Vasquez, Terri Murphy-Sanchez, Liz Castillo, David Kisel, Dr. Manzo.
