What to expect during the COVID-19 Pandemic

For updates on the Covid-19 vaccine, please visit the City of San Antonio COVID-19 vaccination information website. Source: <https://covid19.sanantonio.gov/What-YOU-Can-Do/Vaccination>.

The **Delta** Variant was first detected in the U.S. in March 2021. These variants seem to spread more easily and quickly than other variants, which may lead to more cases of COVID-19. An increase in the number of cases will put more strain on healthcare resources, lead to more hospitalizations, and potentially more deaths. So far, studies suggest that the current authorized vaccines work on the circulating variants. Scientists will continue to study these and other variants. However, some variants might cause illness in some people even after they are fully vaccinated. Source: <https://www.cdc.gov/coronavirus/2019-ncov/variants/variant.html>

Preventive Steps

All residents of Texas above the age of 12 are eligible for the COVID-19 vaccine. When obtaining COVID-19 vaccine please follow up with second dose, if required. Symptoms may appear 2-14 days after exposure to the virus. Source: <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/index.html>.

July is Juvenile Arthritis Awareness Month

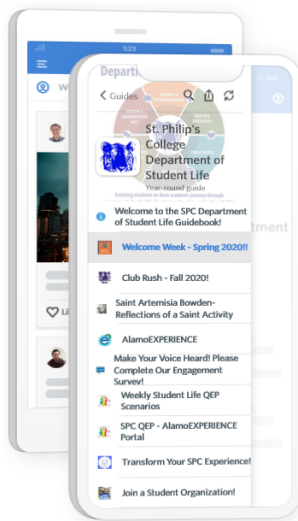

This month we will focus on Juvenile Arthritis, which is represented by the color blue. It is a common misconception that only “old” people are afflicted with arthritis. The form of arthritis that these children and youth experience is not the same as Grandma’s aches and pains. These children and youth suffer from various autoimmune forms of arthritis. Their bodies’ immune system is attacking their joints, causing swelling, stiffness and permanent damage. This condition is extremely serious, and if left untreated can result in loss of mobility, blindness and even death. Source: <https://curearthritis.org/juvenile-arthritis-awareness-month/>
